I would like to thank everyone who came to the HAFFA business meeting last week. The officers are now voted in. It is official. Mike Basta is Prez. Dana is VP. Jack is Treas. Roie is Secretary. Now we are on a path for 2022.

We had a good show and tell:

Jack brought his new glider. It is an Obarski. A great flyer. Tried and True. Meets the SAM rules for hand launch glider. Dana had ran the plans in a recent newsletter —the [June 2021 HAFFA Dispatch](#), to be exact. Click this link to view and print the plans. It looked great with red trim on the wing tips. Jack had some 2 part epoxy putty...interesting stuff which can be formed and sets up in a useful form for various applications.

Mike Basta brought his Cleveland model kits. Just Fantastic. I would like to thank Mike for packaging up all these and hauling them out of his basement.

Renz presented the outdoor trophies to Dana and Mike 2021 winners: Dana won the 2021 intra-club glider event and Mike won the intra-club champs trophy. Congrats to both of you. I would like to thank Dana for putting on the intra-club outdoor contest and looking forward to spring 2022.

Note: This was our first meeting using [Zoom](#). We had 4 members on line watching and participating in the meeting. It worked pretty well. Hope this Covid thing ends soon so we can all meet in person again. Thanks to Suman for setting this up.

Nisley gave a brief presentation on the club website's "Blog" titled [Casey's \(KC's\) Free Flight BLOG](#) which is up and running. Thanks to Nisley for all this hard work. This new aspect of our website is quite extensive.

The meeting finished with a video provided by Dana from NFFS collection: Indoor Glider build/ Cat Launch for Sci-Oly events. Very good presentation. It utilized one of Stan Buddenbohm's glider kits. The library kicked us out at 8pm.
